

# Adult immunization. It's your best shot!

## National Adult Immunization Awareness Week

**Protect Yourself. Protect your loved ones. Protect your patients. Get your flu vaccine.**

Influenza and its complications are responsible for 226,000 hospitalizations and kill more than 36,000 people every year. Healthcare workers have been identified as a key cause of influenza outbreaks among patients in health care settings. Nationally, the influenza immunization coverage rate among health care workers is 40%.
