Dear Vaccines for Children (VFC) Program Participants:

**Important notice: Availability of FluMist Vaccine**

The VFC Program wants to inform all providers that McKesson Specialty has a limited supply of FluMist vaccine (live intranasal for VFC-eligible children 2 to 5 years of age) available for distribution. If you are interested in ordering this vaccine, complete the enclosed Influenza Vaccine Order Form and fax it to the VFC Program at (850) 245-4734.

The FluMist vaccine has expiration dates ranging from December 2008 to January 2009. However, McKesson Specialty has initiated a voluntary replacement program of FluMist vaccine expiring on or before January 2009. The McKesson's Replacement Program will allow the substitution of unused, expiring FluMist doses. Enclosed are McKesson's requirements and vaccine return instructions.

For information regarding the VFC Program vaccine supply, contact Robert Griffin, VFC Coordinator, or your VFC Program Representative at (800) 483-2543. If you have questions regarding McKesson's FluMist Replacement Program, contact McKesson Specialty at (888) 606-3273 or your MedImmune Public Health representative.
